

Crime Solvers, Grades 4-6 **Peek at the Week**

Do you think you have what it takes to be a CSI? Investigate the clues to figure out our LSC whodunit.

Day 1, Powers of the Mind: Today we'll sharpen our minds for investigation by learning how to master our powers of observation, fine-tune our critical thinking skills, and practice obtaining information from witnesses.

Day 2, Gone With a Trace: Step into the shoes of a forensic scientist as we explore physical evidence today. Dust for fingerprints, examine shoe prints, and even make your own bite mold!

Day 3, Following the Hidden Clues: Investigate the evidence that is not always apparent to the naked eye. Today we will carefully analyze hair, fiber, and soil—even extract DNA!

Day 4, Strange Sleuthing: Time to think outside the box. Identify unknown substances using chemical tests and chromatography. Find out how bugs can help you solve crimes!

Day 5, Solving the Mystery: Who is the culprit? Test your investigative skills as you analyze the evidence and piece together the clues. Can you be a Science Center Crime Solver and figure out the puzzle?
