

Maneaters, Grades 3 – 4 **Peek at the Week**

Take a bite out of science as you explore the world's fiercest land and water animals.

Day 1, *Monster Mammals*: Learn about bears, whales, wildcats, and other menacing mammals. Can you be the best predator, or have the best adaptations to survive?

Day 2, *Ferocious Fishes*: Would you want to have a piranha for a pet? Explore the watery world of lethal fish by learning little-known facts and dissecting a shark!

Day 3, *Unlucky on Uncommon Land*: Reptiles and amphibians can be surprisingly deadly—and very fascinating! Experiment with how frog eggs are permeable and how snakes' fangs work.

Day 4, *Dangerous Creatures of the Deep*: How does a jellyfish keep its shape? Why is the slime on a sea snail so important? Learn these things and more about peculiar & perilous sea life!

Day 5, *Stuck on You*: How long can tapeworms grow? Find out as we learn amazing facts about parasites and experiment with live leeches!
