

## Oceans, Grades 1 – 2 Peek at the Week

Investigate this underwater world and the creatures that call it home.

**Day 1, Introduction to the Ocean:** Explore the depths of the ocean. Find out where all that water comes from as you examine the water cycle and how waves are formed. Uncover different habitats of the ocean, and find out why the ocean is so unique!

**Day 2, Creatures of the Ocean:** Take a swim on the wild side. Learn how fish and other animals move through the water, and discover the different areas each type of fish or plant live in.

**Day 3, Coral Reef:** Grab your scuba gear and dive into the coral reef. Learn about the different fish that live there and what they do during the day and during the night. Also, study the diverse range of adaptations of fish that have allowed them to survive in the ocean!

**Day 4, Mysteries of the Sea:** Discover the deep and dark ocean floor today, and learn about other habitats, such as the sea off of Scotland or the Arctic Ocean! Explore all the stories that people have created about the sea and its creatures.

**Day 5, Us and the Sea:** Let's go to the beach and examine how actions affect our environment. Find out how we can protect the animals of the ocean and understand this vast and diverse system.
