

Weird Science

Grades 4-6

Day 1, It's Raining...Frogs?: What makes weather wild? Step in the shoes of a meteorologist as we build weather instruments, simulate fronts and more to understand the amazing world of weather!

Day 2, It's Alive!: What's slimy and slithers when you hold it? The slime, snot, and oobleck we'll make today! Also make your own sidewalk chalk and experiment with static electricity.

Day 3, Animal Oddities: Become a geneticist as we explore what makes animals unique, unusual, and even mutants by designing our own creatures.

Day 4, Odd Jobs: Come boil hair, test odors, and discuss cryptozoology as we investigate the world's weirdest scientific jobs!
